EXPERIENCE

2020
Bomberbot

FRONTEND DEVELOPER
Bomberbot School Manager is a website build using top tech technologies for schools linked to the platform to ease teacher and manage licenses acquired with Bomberbot.

Allowed schools create and download accurate reports, send emails to teachers linked to the school through the website, manage teacher information and create new ones

2016
INFO Internet & Coffee

INDEPENT OWNER
Independent owner, in charge of administrative activities and customer service.

EDUCATION

2020
**Holberton School
Cali**

FULL STACK SOFTWARE ENGINEER
Holberton School is an international academy that trains full-stack developers. Its methodology consists of peer-to-peer learning and guided project.

2014
Universidad Autonoma de Occidente

MULTIMEDIA ENGINEER
It is engineering applied to the generation of multimedia systems that promote new forms of interaction between people and their environment of action, through the implementation of information technologies.

PROJECTS

**Bomberbot
School Manager**

WEB PLATFORM
Developed a MVP for Bomberbot, working as Frontend Developer using React JS with Material UI and CSS.
Github repository:
https://github.com/untalsebastianb/bomberbot_project

**Airbnb
Clone**

WEB PLATFORM CLONE
Test-driven full stack Airbnb web application clone running on (1 load balancer, 2 applications servers with a replication/master database setup) using NGINX as a web server and gunicorn as the application server. (Technologies used: Python, Flask, HTML, CSS, jQuery, MySQL, Linux)
Api exposed using python with flask.
Github repository:
https://github.com/untalinfo/AirBnB_clone_v4

DrumKit

INTERACTIVE DRUM
Interactive drum kit, built with HTML, CSS and Javascript, has different drum sounds, which can be activated with the keyboard. What are you waiting for to have fun, and compose your own song like a professional drummer, come on! visite site: https://untalinfo.github.io/drum-kit/

Batatabit

LANDING PAGE
This project is the development of a 100% responsive website using the mobile firts design philosophy. The project is also built using semantic HTML and good development practices.
Github repository:
https://github.com/untalinfo/Batatabit
